DETAILED ACTION

In view of the appeal brief filed on 11/1/2007, PROSECUTION IS HEREBY REOPENED. A new ground of rejection is set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

- (1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,
- (2) initiate a new appeal by filing a notice of appeal under 37 CFR 41.31 followed by an appeal brief under 37 CFR 41.37. The previously paid notice of appeal fee and appeal brief fee can be applied to the new appeal. If, however, the appeal fees set forth in 37 CFR 41.20 have been increased since they were previously paid, then appellant must pay the difference between the increased fees and the amount previously paid.

A Supervisory Patent Examiner (SPE) has approved of reopening prosecution by signing below:

Claim Rejections - 35 USC § 103

- The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

 Claims 1-3, 7-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kominek et al (US7213027) in view of Greenberg et al (WO 00/39657).

- 3. Regarding claims 1, 7-9, Kominek et al teaches the term "speak through" as referring to users requesting delivery of more information upon presentation of an advertisement. Kominek et al teaches that this term also applies to users browsing the world wide web and clicking on a banner to find out more information. Such interaction (speak throughs) can also be implemented to collect an email address or custom phone number for the advertiser to send more information to a customer [32:4-20]. Kominek et al does not teach the additional information could include coupons sent to the user's phones. Greenberg et al (WO 00/39657) however teaches the concept of delivering redeemable coupons to interested cell phone users [abstract]; the user simply takes his cell phone to a retailer and may redeem the coupon by displaying information concerning the coupon [fig 3D, fig 4]. It would have been obvious to one of ordinary skill at the time of the invention to have provided the banner ads interaction of Kominek et al with the ability for inputting a cell phone number for delivery of a coupon, so that the user could enjoy a paperless and mobile coupon, conveniently redeemable for the advertised product.
- Regarding claims 2, 10, Greenberg et al (WO 00/39657) teaches that the
 providers of the coupons may limit transmission of coupons to users provided a
 maximum predetermined number of coupons has not yet been delivered [4:15-19].
- Regarding claims 3, 11, at least fig 3C of Greenberg et al (WO 00/39657) teaches displaying a subset of coupon information.

6. Regarding claims 12-14, receiving an identifier and delivering information to such a recipient can be taken to be provided by a web server and an ad server, even if accomplished by the same hardware having a plurality of programmed functions (servers). A database of ads and coupons can be taken to be an "ad server" which provides (or "forwards") the stored content to the "web server" responsible for maintaining the connection session with the user and delivery of the queried/extracted database information. Further, Kominek et al teaches that in the context of a banner ad on the WWW, an outside source may be used to mange and audit customer information. It is further well known that web servers cooperate with ad servers in order to delivery information to users from a plurality of separately managed sources. It would have been obvious to one of ordinary skill at the time of the invention to have provided the banner ad from a web server and the coupons from a coupon (or "ad server").

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey D. Carlson whose telephone number is 571-272-6716. The examiner can normally be reached on Monday-Fridays; off alternate Fridays.
